

Lab in a Lorry is coming to Yorkshire

Do you have a scientific or engineering background? If so there is an interesting volunteering opportunity coming your way.

Lab in a Lorry is an interactive mobile lab designed to give young people aged 11 to 14 the opportunity to explore science through open-ended experiments. It is visiting the Yorkshire area in May 2015 and needs volunteers with a scientific or engineering background to help guide the students through the experiments and make sure everyone gets involved.

Smash a wine glass with sound, create spiral rainbows, use light to heal wounds and explore medical optoelectronics –volunteers needed!

Do these things sound intriguing? Are you interested in communicating science to a young audience? Lab in a Lorry needs volunteers with a scientific or engineering background for events in Yorkshire in May 2015.

What would I have to do?

You would be asked to oversee an experiment for the day. We send you all the background material in advance and on the morning of an event you receive full training on the lab.

We ask that volunteers commit to a minimum of one full school day, but you are welcome to come along for as many days as you like. In return you'll have a rewarding and unforgettable experience, receive some Institute of Physics freebies (IOP) and also be awarded affiliate membership to the Institute of Physics for a year

More information?
