

NCEA

World of Work Day

Wednesday 9 March 2016 10.00 – 13.00

The aim of this event is to inspire learners aged 11-18 about the job opportunities available in the North East, and further afield, and help them to see a link between their studies in school and the real world. Our hope is to widen students' knowledge of different career areas, encourage them to become involved in activities outside school to develop their employability skills and inspire them to be what they want to be.

How can you help?

Just bring along an exhibition stand and people to run it! This could include experienced professionals, young apprentices and graduates. Our learners can then approach you and find out what they need to consider if they want to do what you do.

What should you bring?

Anything that can inspire young people about your career, study or training area. We'll provide the tables, chairs, power sockets and refreshments, all you have to do is provide your expertise and something practical for them to do. This could be:

- A problem solving activity or puzzle of some sort
- A short video or photos for learners to look at
- A short educational game to play
- Examples of products you make or equipment you use
- Something creative and quick for learners to build or design

Who do you contact for more information?

Please contact Mark Fox, Careers Adviser at NCEA, for more details or to arrange a visit if you would like a tour of the Academy beforehand. We look forward to seeing you!
